MAKING A DENTAL 'IMPRESSION'

Dr. Will Baker and his team at Landreth Team Dentistry explain what makes them one of Wichita's Top Family dental practices.

A CALL TO SERVE

Thousands to volunteer across Wichita on April 24 for the second annual LOVE Wichita event. See how you and your family can help.

An educated, community-conscious team

Landreth Team Dentistry was established in 1967 by Dr. Estel Landreth. Four years ago Dr. Baker joined the practice to learn from the experienced Dr. Landreth.

"Dr. Landreth is my mentor and really is the best around to teach me everything I need to know," said Dr. Baker. "I didn't want to come out of dental school and just go from there. I have learned valuable skills and knowledge by joining him and now taking over his practice."

In addition to choosing mentors who are the strongest in their fields, Dr. Baker emphasizes continuing education for both himself and his team as an important part of serving his patients.

"Dentistry can be boring if all you do day-in and day-out is clean teeth and fill cavities," said Dr. Baker. "I find it refreshing to continuously be learning more and finding new and innovative ways to offer my patients the best possible treatments and solutions to their dental needs."

Dr. Baker takes many continuing education hours each year that go above and beyond the requirements by the state. He and his team also take part in team-building education that furthers their abilities to help patients feel comfortable during visits.

"When you're building a home you need a good floor plan, a good builder, a good interior decorator to end with the best home," said Natalie. "It's the same for a good dentist. You need a good support team, a high-quality lab, all of these things prior to starting the actual treatments so we're able to have the best outcome."

The office also has bonded by taking part in numerous community projects either by donating time or services. Rather than Christmas parties in recent years, the team has given back by visiting and donating to patients at a local hospital.

The team also is involved in school dental checks, Special Olympics checks, and donates services to several

local charities. Dr. Baker has visited numerous area middle schools to do a Meth Mouth presentation that he hopes can make an impact and prevent future issues as well.

As one of the area's leading dentists in the cosmetic field, Dr. Baker recently completed his second transformation donation for the American Academy of Cosmetic Dentistry's, "Give Back a Smile," program that provides complimentary dentistry for survivors of domestic abuse.

Team up with dental professionals who care. Dr. Baker and his friendly staff will go out of their way to keep you healthy and comfortable.
